Abstract. I wonder, what's not to love?

Section

Subsection. Without a newline after a == line, the subsection name is set on the same line as the following text.

Gallery.

Here, note that the subsection title is on a line of its own.

Below are some font alterations. Note that small-caps does not work with 'times' so I changed this memo class to use 'libertinus serif'.

- Small Caps Example
- *italic example*
- **bold-faced example**
